VIRTUAL SESSION REPORT

RCI Name	National Institute of Technical Teachers Training & Research, Chandigarh
Date & Day	28.06.2021 / Monday
Time	2.30 pm to 3.30 pm
Language	Punjabi
Expert Name & Designation(Doctors/ Consultant/Speakers)	<p>1. Dr. Pawan Kumar Kansal, MBBS, MD (Medicine), Cardiologist & Physician NITTTR, Chandigarh</p> <p>2. Sh. Vinay Kumar Luthra Covid-19 Warrior Covid Care Center, Indira Holiday Home, Sector-24, Chandigarh</p>
Expert's Bytes	<p>1. Expert name and description of information they share in session. Dr. Pawan Kumar Kansal, MD (Medicine) shared information about symptoms of Covid-19, precautions to be taken during pandemic and regarding vaccination.</p> <p>2. Expert name and description of information they share in session. Sh. Vinay Kumar Luthra, Covid-19 Warrior shared his experience about the challenges and ayurvedic methodology in treatment of Covid-19 patients.</p>
Questions & Answers session	<p>Important question arose during the session and the experts' response</p> <p>How will the patient come to know whether he/she is covid-19 positive or it is a normal cough and cold ? RT-PCR Test needs to be conducted so that the patient can be informed whether he/she is covid-19 positive or not.</p> <p>If RT-PCR test is negative is possible that the person is still covid-19 positive? The test is repeated alongwith other tests if the person shows symptoms.</p> <p>Many a times RT-PCR test is negative in one laboratory and positive in another laboratory ? Yes, it is possible and this is the reason that symptoms of the patient are also looked into.</p> <p>Which vaccine is effective ? All the vaccines are effective with different percentage of efficiency.</p> <p>How to handle the physical and mental state of the covid-19 patient ?</p>

	<p>Covid-19 patient be administered medicine as per doctor's instructions and upon successive progress of treatment, the mental state of the patient is also recovered.</p> <p>Sometime the oximetry is not calibrated ? Appropriate time should be given for getting the result from oximetry.</p> <p>What is the advise for those who want to start covid care centre in the rural areas ? Small groups in the villages can start the covid care centre. The existing infrastructure such as : Schools, Dharamshala can be used for establishing covid care centre. The very first thing should be done is to generate awareness among villages about covid and vaccination.</p> <p>What precaution should be taken regarding black fungus for those who are in home and those who are in covid care centre ? The diabetic patients are more vulnerable to black fungus due to reduced immune system. The precautions to be used should be that the water used in the ventilator should be sterile and be changed daily, mask be changed daily. Some of the symptoms are pain in the eyes, swelling in the face, the doctor should be consulted for further treatment.</p> <p>Many a times people eat food affected with fungus. What do you have to say about relationship with black fungus ? The fungus is all around in the environment. The persons with weak immune system only gets affected and this is the case with covid-19 patient.</p>
Glimpse (2 pictures) of the session.
